

Gisborne and District Bowling Club inc.
INFECTION PREVENTION POLICY

Purpose

This policy was adopted to mitigate the risk to Members, visitors and the Club due to the health threat arising from inadequate infection prevention.

Policy

The priority is to enable the safe opportunity to play bowls, and members and visitors to safely utilise the Club facilities.

“Better Practice for Infection Prevention” which is a separate document, aims to mitigate the risk to members and visitors, and the Club due to the health threat from inadequate infection prevention.

The “Better Practice for Infection Prevention” document will be updated as circumstances change and any advice from Bowls Victoria, Bowls Australia and the Victorian State Government. That document and any updates thereto require Board approval prior to issue to all Members and must be displayed at all entrances to the Club facilities.

Reviewing this Policy

This policy will be reviewed every two years, and we undertake to seek points of view, comments and suggestions from members when this review takes place.
